Assignment

1. Create a simple blog webpage on PW Skills. The webpage must contain at least 2 headings, 1 image, and some information about PW Skills.
2. Create a simple webpage with the PW Skills logo and add a title attribute with the value "PW Skills". Observe the changes that the title attribute applies to the image.
3. Create a `<audio>` tag that has controls to pause, play, and adjust the volume.
4. Create a `<audio>` tag that automatically starts playing a song when the page loads. The audio tag should have controls to pause, play, and adjust the volume. Additionally, the song should be set to loop continuously until it is paused by the user.
5. Create a `<video>` tag that automatically starts playing a sunrise video when the page loads. The video tag should have controls to pause, play, and adjust the volume.
6. Create a similar webpage as we built for assignment question 5. Add a poster attribute to the `<video>` tag that displays an image of the sunrise.
7. Create a similar webpage as we built for assignment question 6 and disable the download option.
8. Create a simple webpage that displays Wikipedia's physics wallah page using an `iframe`.
9. Create a feedback form with a field for the user's name, email address, and message.
10. Create a registration form with fields for the user's name, email address, password, and a checkbox to agree to the terms and conditions. Use the text input type for the name and email fields, the password input type for the password field, and the checkbox input type for the terms and conditions field.
